KEY TRENDS

Here is a snapshot of the key trends that we're seeing in the resources collected.

This month the Clearing House search focused on digital health and primary healthcare. A total of **20 articles** on the topic were collected over a span of three weeks. Of these 20 resources, most of the articles were related to **telemedicine** services provided by private companies (65%), followed by a specific focus on **E-health** (35%). In terms of health system functions, 60% of the articles were related to **service delivery**, and 45% to **health system governance**.

COUNTRY FOCUS

Rwanda

[Digital Health: A Health System Strengthening Tool for Developing Countries](#) highlights how Rwanda's government is working with the private sector to

leverage digital health in reaching underserved populations. In particular, it presents a range of private sector companies that are currently engaged with digital health by offering health and personal care products for women, as well as working in medical commodity delivery.
